Probiotics Guide
Including information on the Probiotics Resource Centre
Stand G140
The Probiotics Market
A Key Segment for Future Growth

With the global probiotic industry expected to reach a value of €53 billion by 2023, probiotic awareness is at an all-time high. The rapid increase in the global consumption and the development of new and innovative probiotic-based products testify to how far the sector has come. However, the industry is still young. More than ever, consumers, businesses and government agencies need guidance, assistance and information on probiotics from one collective and credible source.

The International Probiotics Association (IPA) is a global non-profit organization bringing together through its membership, the probiotic sector’s stakeholders including but not limited to academia, scientists, health care professionals, consumers, industry and regulators. The IPA’s mission is promote the safe and efficacious use of probiotics throughout the world. Holding NGO status before Codex Alimentarius, the IPA is also recognized as the unified Global Voice of Probiotics®.

Join the rest of the international community and key stakeholders in promoting science across the globe. It is IPA members which make up and create the value offered from the association. The pool of talent and resources which comes from our member company representatives working first hand within our committees addressing regulators, helping increase probiotic awareness & outreach activities to health care providers drives the association’s growth. With your support, the IPA will continue to increase probiotic awareness as the Global Voice of Probiotics®.

The Probiotics Resource Center, organized in association with the International Probiotics Association and sponsored by Nutrasource Pharmaceutical and Nutraceutical Services, offers Vitafoods Europe attendees a high-profile location to learn about key issues in the probiotics market. In this area of the exhibition, visitors can access a wide range of content, including theater presentations & product showcases, and have the opportunity to sample a selection of ingredients & products from category leaders. For the first time at Vitafoods Europe in Geneva, the IPA will be showcasing infographics within the Probiotics Resource Center: Understanding the E.U. Adult Probiotic User. The presented data is a glimpse of an IPA commissioned report exclusive to membership which was based on the Natural Marketing Institute’s (NMI) Global Supplement/OTC/Rx Database™(SORD). NMI surveyed consumers aged 18+ in the U.K., Germany, Italy and France to understand health behaviors, demographic profiles, supplement usage (i.e. drivers, influencers & concerns) as well as purchase habits (i.e. quality over price, store vs national brand) of adult E.U. probiotic users. Stop by Stand G140 and discover new market opportunities within the probiotic sector!

We look forward to seeing you there!

Elisa Fernández
Director Member Relations & Communications
International Probiotics Association
Elisa@internationalprobiotics.org
www.internationalprobiotics.org
Increasing consumer health concerns contribute significantly to the probiotics market growth, while rising disposable income and increasing standards of living will benefit the overall market. There are real business opportunities for probiotic manufacturers looking to provide effective products to help manage illness and promote overall health and wellness.

Discover the latest breakthroughs in probiotic technology, new product development, consumer analysis and market trends through the exhibitors, a presentation theatre and infographics in the Probiotics Resource Centre.
Featured Exhibitors at Vitafoods Europe

Angel Yeast Co., Ltd.
Angel Yeast is the largest yeast manufacturer in Asia. We have 12 plants around the world and we provide natural yeast featured products with unique quality, best service and competitive price. Probiotics, Yeast beta glucan(Soluble/Insoluble), Nutritional yeast and Selenium yeast are our featured products.

Bifodan Inc
BIFODAN manufactures innovative probiotic finished solutions for B2B customers. Dedication to probiotics and expertise in research and development of probiotic supplements is the foundation of our YOURBRAND products. YOURBRAND solutions are based on clinically documented probiotics in right amounts. All products manufactured at our GMP/NSF/FDA inspected factory in Denmark. www.BIFODAN.com.

Biosearch Life
Biosearch Life is a biotechnological company with a global innovative vocation. We bring innovation in healthy natural ingredients integrating our research, development, production and marketing capacities around three product platforms: Omega-3 (Eupoly-3®), Probiotics (Hereditum®), Botanical Extracts (Exxentia®).

Chr. Hansen A/S
Chr. Hansen is a global bioscience company, offering a premium range of probiotics under the Probio-Tec® brand. Probio-Tec® is a range of probiotic solutions that add value to your brands by combining powerful concepts, premium strains, compelling secondary ingredients, breakthrough dosage forms and technologies. Probio-Tec®… when science matters.

DuPont Nutrition & Health
DuPont Nutrition & Health, a business unit of DowDuPont Specialty Products Division, combines in-depth knowledge of food and nutrition with current research and expert science to deliver unmatched value to the food, beverage, pharmaceutical and dietary supplement industries.

Discover the most exciting innovations to hit the Probiotics market in the past 12 months, on display in the Probiotics Resource Centre – Stand G140.

**Your brand solutions with documented probiotics**

**Bifodan A S**

YOURBRAND PROBIOTIC TURNKEY SOLUTIONS are formulated with specific probiotic strains in adequate amounts for targeted health benefits based on clinical data. YOURBRAND products from Bifodan have undergone thorough development and testing and offer industry standard shelf life stability. All products target specific market demands – ready to distribute under private label. Visit us at booth L35.

**RESPECTA®: gender-specific probiotic support**

**Giellepi SpA**

RESPECTA® is a unique oral solution with a proven mechanism for treatment of vaginal dysbiosis in women. A number of studies confirm that, after oral consumption, RESPECTA® colonizes the vaginal tract supporting vaginal microbiota. It can achieve these positive results alone or in conjunction with standard antimicrobial treatments for bacterial vaginosis and yeast infections.

**HOWARU® Protect Probiotics**

**DuPont Nutrition Biosciences ApS**

Looking for new opportunities to add documented health benefits to your products? Discover HOWARU® Protect, a range of truly unique patented probiotics designed to help maintain natural immune defences for targeted populations and lifestyle situations. With DuPont all products are manufactured to the highest quality standards, tested rigorously ensuring safety and stability through shelf-life.
**Probiotics Theatre**

**TUESDAY 15 MAY**

**11:00 - 11:30**

**KEYNOTE**

Interaction between gut microbiota and the immune system

Ger Rijkers, Professor in Biomedical and Life Sciences, Head of the Department of Science, Roosevelt Academy

**11:40 - 12:10**

Effects of HOWARU® Protect Senior in cellular immune function in healthy elderly

- The importance of functioning immune system in the elderly
- How probiotics may improve immune system and gut microbiota in the elderly through different mechanisms which lead to health benefits
- How daily consumption of HOWARU® Protect Senior enhances cellular immune activity in healthy elderly adults

Liisa Lehtoranta, Research Manager, DuPont Nutrition & Health, Finland

**12:20 – 12:50**

Probiotics and improved athletic performance

- Scope of the influence of the Microbiome on the human physiology
- Potential role of the Microbiome in athletic performance
- Published evidence of probiotics improving performance of elite athletes

Dr. Nigel Plummer, Managing Director, Cultech Ltd.

**13:40 – 14:10**

Designing stable probiotic solid dosage forms

- Reviewing and selecting raw materials best suited for a specific solution with regards to manufacturing feasibility, stability, organoleptic quality, etc.
- Protecting probiotic strains throughout production, packaging and shelf storage by optimizing processes and fitting product with end-product in mind.
- Experience from a wide range of projects gives knowledge about what can be done, leading to qualified feedback to costumer.

Martin Asmussen, Product Development Scientist, Bifodan A/S

**14:20 – 14:50**

What to expect when conducting a dietary supplement clinical trial

- Present the clinical trials timeline for different product types and project goals
- Discuss tools to improve communication of project status between the sponsor and research partner
- Explain key documents that form the backbone of good clinical practice
- Review the cost of quality clinical research

Joshua Baisley, Director of Clinical Trials - Domestic, Nutrasoure

**15:00 – 15:30**

Probiotics for hearty kids & teens

- Microbiota in kids & teens
- Specific challenges
- Possible probiotic solutions targeting Natural Defenses, Oral Health, Brain-Gut Axis and Skin health in Active Kids & Teens

Bérengère Feuz, Marketing Manager - Lallemand Health Solutions

**15:40 – 16:10**

New evidence for Lactobacillus plantarum TWK10 in exercise performance

- The innovative application of probiotics in gut-muscle axis
- The first Lactobacillus strain to increase muscle mass
- A new ergogenic supplement for aerobic exercise

Billy Tsai, Sales Specialist - SYNBIO TECH INC.

**16:20 – 16:50**

The immune role of fermentation metabolites in the gut

- The role of the microbiome in the human immune system
- The immune and gut benefits of fermentation metabolites
- Formulation options for providing fermentation metabolites through a food supplement

Justin Green, Director of Scientific Affairs - Embria Health Sciences
**WEDNESDAY 16 MAY**

**11:00 – 11:30  KEYNOTE**
Probiotics: Avenues towards a more workable EU Regulatory Model.

**11:40 – 12:10**
Emerging trends in probiotic products
- Examples of new and innovative probiotic food and beverages, including the technologies that enable them
- Moving beyond a niche examples of the most successful categories and examples of market leaders formulating with probiotics
- What’s next in the category?
**Stephen Quinn**, Business and Regulatory Director – Kerry

**12:20 – 12:50**
Human challenge models for infection resistance as valuable tools to substantiate the beneficial health effects of food ingredients
- Controlled challenges allow for smaller and shorter studies
- The E. coli challenge model is a valuable tool to study the effect of food ingredients on the resistance against infection in healthy subjects
- Vaccination response is an accepted outcome to support immune-boosting effects
**Alwine Kardinaal**, Expertise group leader Nutrition & Health, NIZO

**13:00 – 13:30**
Could probiotics delay the onset of gluten intolerance?
- Lactobacillus plantarum HEAL9 and Lactobacillus paracasei 8700:2 is proven to suppress gluten-induced autoimmunity in genetically predisposed children.
- The effect on the inflammatory immune response was apparent already after 3 months of intake and further strengthened after 6 months.
- The probiotic concept may offer a completely new preventive option for individuals at risk for developing gluten intolerance.
**Caroline Montelius**, Associate Scientist - Probi AB

**13:40 – 14:10**
Probiotic manufacturing excellence, from fermentation to finished product
- Probiotic manufacturing best practices
- Improving quality and efficiency in fermentation
- Preventing potential pitfalls
**Gregory Leyer**, Chief Scientific Officer - UAS Labs

**14:20 – 14:50**
Next Frontier in Probiotics: Human-Residential Bifidobacteria: their composition, compatibility and physiological features in human gut
- Latest research of gut compositional changes of Bifidobacterium species from newborn infants to centenarians
- The difference of compatibility with human breast milk and other features of Bifidobacteria between HRB and non-HRB
- Latest clinical research of HRB probiotics
**Mai Nozawa**, Sales Associate, Moringa Milk Industry

**15:00 – 15:30**
RESPECTA®: Gender-specific probiotic support
- Respecta® colonize vaginal microbiota
- Respecta® maintain a healthy vaginal microbiota
- Respecta® reduce recurrences of vaginal infections
**Prof. Francesco De Seta**, Assistant Professor of Obstetrics and Gynaecology at the University of Trieste - IRCCS B. Garofolo, Italy – Giellepi

**15:40 – 16:10**
Bacillus Subtilis HU58- A Unique, Versatile, Performance Probiotic
- Bacillus subtilis HU58 - The high performance Probiotic.
- Human origin, extensively documented, proven health benefits.
- Can be made available in a wide range of innovative formulations and food concepts.
**Kiran Krishna**, Microbiologist, Synergia Life Sciences

**16:20 – 16:50**
The art of manufacturing an innovative probiotic product
- There is still plenty of innovation surrounding probiotics
- Special handling of probiotics during manufacturing is key, especially when combined with other ingredients
- Packaging choices matter
**Jeremy Bartos**, Vice President Research & Development - MeriCal
A Healthful Partnership. It’s What’s Inside.

What’s inside some dietary supplements is just as beneficial to you as it is to consumers. That’s because our probiotics come with the scientific expertise that only DuPont Nutrition & Health can provide. Plus clinical research, unrivaled product stability, new product formulations, and formats that deliver unique health benefits, marketing insights, and, of course, safety. Take a look inside DuPont Nutrition & Health to see how we can deliver on your dietary supplement needs. Visit dupont.com/itswhatsinside to learn more.
